EXPERIENCE

Universidad Carlos III de Madrid

Research Assistant, Department of Bioengineering

September 2024 – December 2024

Leganes, Spain

Research on deep learning algorithms for medical image processing and quantification.

- Design of YOLO and Unet models to segment lung nodules and lungs in CT scans.
- Research on novel machine learning algorithms and architectures in computer vision.
- Custom models in PyTorch, trained on GPU clusters.

Tecnun University of Navarra

Bachelor Thesis

February 2024 – June 2024

San Sebastian, Spain

Development of an AI-based system for the classification of cervical cytology samples.

- Classification of digital pathology images using weak supervision and multiple instance learning.
- State-of-the-art evaluation, data collection and analysis, programming, and evaluation.
- Model created in Pytorch, consisting of a ResNet CNN followed by a RNN.
- Achieved 97% accuracy and 98% F1 score on the test set.

Fundación Vicomtech

Intern

June 2023 – August 2023

San Sebastian, Spain

- Developed a visual analytics interface with Python and Streamlit for cancer patient data.
- Contributed to the frontend of the TopFIND web scraper, fixing bugs and adding features.
- Provided technical support for the Cancer Survivor Smart Card project.

Tecnun eRacing

Formula Student, Head of Race Engineering

August 2022 – August 2024

San Sebastian, Spain

- Race engineer for a Formula Student team.
- Led a team of 3 managing all on-track activities and drivers.
- Created reports with Jupyter Notebooks to visualize vital car data.
- Part of the trackside team at the Barcelona-Catalunya circuit, 5th place (2023) and 2nd place (2024) .

PROJECTS

CAF Machine Learning Challenge

April 2023 – May 2023

- Trained a model to find defects in railway tracks using vertical acceleration data from trains.
- Supervised classification with Gaussian kernel SVM, trained in MATLAB.
- Won first place with an F1 score of 97% on the test set.

EDUCATION

Tecnun University of Navarra

Bachelor's Degree in Biomedical Engineering

June 2024

San Sebastian, Spain

- Class representative

SKILLS

Python, MATLAB, R, SQL, C++, Git, Docker, Scikit-Learn, Power BI, Tableau, Mathematics and Statistics, Prompt Engineering. **Languages:** English (C2), Spanish
